

ABOUT ME

I love being surrounded by technology, communication and everything related to the Web and its users. I am especially passionate about UX design, UI design and the possible interactions that occur in this highly digitized world.

I am always aware of what is happening around me, of new trends and being connected all the time. I have had the opportunity to work both as a freelancer and in multidisciplinary teams, and in both I have learned and achieved significant results. I am always looking for and facing new challenges.
